Version 0.3 — Cards, Levels & Pack System Refined

Single source of truth. Includes all design, values, and technical decisions.

1. Technical Stack

Android-only, Kotlin + Jetpack Compose. No Java, no LiveData, no GlobalScope.

Technology	Version	Notes
Kotlin	1.9.22	Primary language. No Java.
AGP	8.3.0	Do not update without reviewing KSP compatibility.
KSP	1.9.22-1.0.17	Must match Kotlin version exactly.
minSdk	28 (Android 9)	Minimum supported.
targetSdk / compileSdk	34	Current target.
Jetpack Compose BOM	2024.02.00	Manages Compose versions internally.
Hilt	2.50	Dependency injection.
Room	2.6.1	Local persistence.
Coroutines	1.7.3	Game loop and async operations.
Gson	2.10.1	GameState serialisation to JSON for Room.
DataStore	1.0.0	Lightweight config and preferences.
Navigation Compose	2.7.7	Screen navigation.

1.1 Architecture — Clean Architecture (Strict)

- domain/model/ — All entities and models. Each in its own file.
- domain/engine/ — GameEngine: pure logic, zero Android or Compose imports.
- domain/usecase/ — Optional use cases for complex logic.
- data/db/ — Room entities, DAOs, Database.
- data/repository/ — GameRepository: load and save game state.
- presentation/viewmodel/ — Hilt ViewModels connecting engine to UI.
- presentation/screen/ — Compose screens.
- presentation/ui/theme/ — Theme, colours, typography.
- app/di/ — Hilt modules.

⚠ GameEngine must NOT import anything from Android or Compose. Pure logic, fully testable with JUnit.

⚠ No business logic in ViewModels. No logic in Compose. Never use LiveData — Flow and StateFlow throughout. Never block main thread with Room — always Dispatchers.IO.

2. Game Overview

Monster Packs is an offline mobile card-collecting game. Players open packs to discover creatures, real animals, plants, objects, landscapes, and legendary beings — completing collections and levelling up. No internet connection required. Visual style: colorful, epic, modern, detailed. Non-minimalist.

2.1 Core Loop

- Open the free Basic Pack — unlimited, no cooldown.
- Cards are revealed one by one in ascending rarity order (least rare first, most rare last).
- Earn Coins and Gems from each card obtained.
- Earn XP per pack opened — level up to unlock upgrades.
- Spend resources on Special Packs or upgrades in the Shop.
- Complete collections.

2.2 Navigation — Bottom Tab Bar

Tab	Icon (placeholder)	Description
Pack		Main free pack opening screen.
Collection		View all cards, unlocked and locked.
Shop		Buy special packs, upgrades.
Settings		Language, Google Play save, legal links.

3. Models

Cards are pre-defined static entities. Opening a pack reads from the existing pool and updates the player's copy count. Pack sessions are not persisted — only the resulting card counts and resources matter.

3.1 Card

Field	Type	Description
id	Int	Unique identifier.
name	String	Display name.
type	CardType (enum)	Thematic family. Determines background colour.
rarity	Rarity (enum)	Drop probability, shape, animation, rewards.
collection	Collection (ref)	Card pool this card belongs to.
imageRes	String / ResId	Placeholder or final illustration.
coinReward	Int	Coins awarded on obtain.
gemReward	Int	Gems awarded (0 for Common / Rare / Epic).
copies	Int	Player-owned copies. 0 = locked (silhouette).
isVariant	Boolean	True if this is a Special / Legendary / God variant of a base card.
baseCardId	Int?	Reference to the base card if isVariant = true.

3.2 PackDefinition

Field	Type	Description
id	String	Unique identifier (e.g. 'pack_basic', 'pack_fire').
name	String	Display name.
type	PackType (enum)	BASIC, TYPE_THEMED, RARITY_BOOSTED, LUCKY, REWARD.
collection	Collection (ref)	Card pool source.
cardPool	List<CardType>?	TYPE_THEMED only: restricts to these types.
slotRules	List<SlotRule>	Per-slot rarity rules or roll distribution.
cost	PackCost?	Null for free packs; otherwise Coins or Gems.
designRes	String / ResId	Visual asset — unique per pack type.
xpReward	Int	XP granted to the player when this pack is opened.

i A pack can never contain two copies of the same card. The roll engine must re-roll duplicates within the same opening session.

3.3 SlotRule

Field	Type	Description
slot	Int	Slot index (1–5 for standard packs).
guaranteedRarity	Rarity?	If set, this slot always yields exactly this rarity.
minimumRarity	Rarity?	If set, roll cannot produce below this rarity (Lucky Packs).
rollTable	Map<Rarity, Float>?	Custom probability table for free-roll slots.

3.4 Collection

Field	Type	Description
id	String	Unique identifier.
name	String	Display name.
cards	List<Card>	All cards in this collection (base + variants).

3.5 PlayerState

Field	Type	Description
coins	Long	Current coin balance.
gems	Long	Current gem balance.
xp	Long	Total accumulated XP.
level	Int	Current player level.
cardCopies	Map<Int, Int>	cardId -> copy count.
rewardPackReadyAt	Long?	Epoch ms when next Bonus Pack is ready.
basicPackUpgradeLevel	Int	Upgrade tier for Basic Pack.
rewardPackUpgradeLevel	Int	Upgrade tier for Bonus Pack.

4. Card Types

10 types in the initial collection. Card counts per type are not equal by design — some types feel more exclusive. Each type has between 12 and 20 cards (including variants). Types can contain fantastical creatures, real animals, plants, objects, and real-world phenomena. Future collections may introduce fully real-world types (e.g. 'Dogs').

Type	Theme	Colour (hex)	Card Count
Infernal	Fire, volcanoes, magma, hell	#C0392B (deep red)	15
Abyssal	Deep sea, darkness, pressure	#1A3A5C (dark navy)	14
Spectral	Death, dark magic, undead	#4A235A (dark purple)	14
Celestial	Stars, cosmos, divine light	#D4AC0D (gold)	15
Storm	Lightning, wind, tempests	#2874A6 (electric blue)	14
Verdant	Forest, nature, plants, earth	#1E8449 (forest green)	13
Frost	Ice, tundra, arctic creatures	#AED6F1 (ice blue)	14
Arcane	Pure magic, runes, constructs	#7D3C98 (violet)	14
Savage	Wild beasts, primal instinct	#D35400 (burnt orange)	14
Mythic	Gods, ancient myths, legends	#B7950B (antique gold)	15

◆ Card counts include all variants (Special, Legendary, God). Base cards only range from 10–13 per type.

5. Rarities

Rarity controls drop probability, card visual shape/frame, animation tier, and rewards. Cards are always revealed in ascending rarity order within a pack — least rare first, most rare last — to build tension.

Rarity	Coin Reward	Gem Reward	Base Drop % (free slots)	Animation
Common	1	0	~58%	Simple fade-in
Rare	2	0	~35%	Glow pulse
Epic	10	0	5%	Particle burst
Special	100	10	1%	Full-screen shatter
Legendary	500	50	0.1%	Epic cinematic
God	2000	200	0.01%	Full legendary sequence

5.1 Variant Card Rules

Special, Legendary, and God cards are redesigned variants of existing base cards, not independent new creatures. They feature enhanced artwork, special frames, and full-art layouts.

Variant Tier	Based on	Visual Treatment	Rule
Special	Rare or Epic base card	Enhanced illustration, special background effects	Some Rares and Epics get a Special variant
Legendary	Epic base card	Full-art, card border dissolves into the artwork	Only selected Epics get a Legendary variant
God	Common, Rare, or Epic base card	Unique layout, representative of the entire type	Exactly one God card per type (10 total)

i Common cards never have Special or Legendary variants. God cards are selected from any rarity tier — they should be the most iconic creature of their type.

6. Card Catalogue — Initial Collection

Full proposed card list for the initial collection. Rarities are initial proposals — subject to review and adjustment. Variants (Special, Legendary, God) are listed alongside their base card.

7. Pack System

All packs follow the same session rules: 5 cards (or 3 for Bonus Pack), no duplicate cards within the same opening, cards revealed in ascending rarity order (lowest rarity first).

7.1 Basic Pack (Free, Unlimited)

Slot	Rule
Slot 1	Always Common
Slot 2	Always Common
Slot 3	Always Rare (exactly)
Slot 4	Free roll: ~58% Common, ~35% Rare, 5% Epic, 1% Special, 0.1% Legendary, 0.01% God
Slot 5	Same free roll as Slot 4

i After rarity is determined per slot, the engine rolls within all cards of that rarity in the active pool. No card can appear twice in the same pack session.

7.2 Bonus Pack (Free, Cooldown-Based)

Available in the Shop. Generates automatically on a timer. All parameters are upgradeable using Coins and Gems (requires sufficient player level).

Parameter	Default Value	Upgradeable?
Cards per pack	3	Yes
Gems per pack	5	Yes
XP per pack	5	Yes
Cooldown	10 minutes	Yes — reduced per upgrade tier
Max stored packs	1	Yes — increased per upgrade tier
Card rarity table	Standard free roll	Yes — improved per upgrade tier

7.3 Special Packs (Paid — Coins or Gems)

Each Special Pack has a unique visual design reflecting its theme. Three categories:

7.3.1 Type-Themed Packs (10 packs — one per type)

Restricts the card pool to that type only. Standard rarity distribution applies. Players who want to target a specific type's cards use these.

7.3.2 Rarity-Boosted Packs

Increases the probability of a target rarity appearing across all slots. Does not guarantee a minimum — it shifts the probability table. Example: an Epic-Boosted Pack might raise Epic drop rate from 5% to 20% on free-roll slots.

Pack Name	Boosted Rarity	Approx. Boosted Drop Rate (free slots)
Rare Boosted Pack	Rare	Rare: ~55%, Common: ~38%, Epic: 6%, others unchanged
Epic Boosted Pack	Epic	Epic: ~20%, Rare: ~40%, Common: ~33%, Special: 6%, others unchanged
Special Boosted Pack	Special	Special: ~8%, Epic: 10%, Rare: ~35%, Common: ~40%, Legendary: 6%

7.3.3 Lucky Packs

All slots have a guaranteed minimum rarity — no card below the threshold can appear. Distinctly different from Rarity-Boosted: Lucky Packs replace the floor, Boosted Packs shift the table.

Pack Name	Minimum Rarity (all slots)	Roll above minimum
Lucky Epic Pack	Epic	5 cards, all Epic or above. Distribution: ~80% Epic, 15% Special, 4.5% Legendary, 0.5% God
Lucky Special Pack	Special	5 cards, all Special or above. Distribution: ~85% Special, 13% Legendary, 2% God
Lucky Legendary Pack	Legendary	5 cards, all Legendary or above. Distribution: ~92% Legendary, 8% God

7.4 Pack Upgrade Event (Surprise Pack)

When the player taps to open a Basic Pack, a low-probability check fires before the first card is revealed. If triggered, an 'evolution' animation plays and the pack upgrades to a Special Pack for this session.

Detail	Value / Note
Trigger moment	On player tap — before first card reveal
Base probability	~0.5% (to be tuned)

Resulting pack type	Random Special Pack, weighted by rarity of pack type
Probability of each result	Type-Themed: 50% Rarity-Boosted: 30% Lucky Epic: 12% Lucky Special: 6% Lucky Legendary: 2%
Animation	Evolution animation upgrades pack visuals before opening sequence begins

8. Resources

8.1 Coins

Source	Amount
Common card obtained	+1 coin
Rare card obtained	+2 coins
Epic card obtained	+10 coins
Special card obtained	+100 coins
Legendary card obtained	+500 coins
God card obtained	+2,000 coins

8.2 Gems

Source	Amount
Special card obtained	+10 gems
Legendary card obtained	+50 gems
God card obtained	+200 gems
Bonus Pack opened	+5 gems (base, upgradeable)

i Coins and Gems are always awarded regardless of whether the card is new or a duplicate. A future 'Fuse' mechanic will let players trade duplicates for bonus resources.

9. User Level System

Players earn XP by opening packs. Levelling up unlocks the ability to purchase upgrades for the Basic Pack and Bonus Pack in the Shop. The level system adds a long-term progression layer and gates upgrades to prevent early over-optimisation.

9.1 XP Sources

Source	Base XP	Upgradeable?
Basic Pack opened	10 XP	Yes — via Basic Pack XP upgrade
Bonus Pack opened	5 XP	Yes — via Bonus Pack XP upgrade
Special Pack opened	20 XP	No (fixed)

9.2 Level Thresholds (Initial Proposal)

Values are illustrative and subject to tuning. The curve steepens progressively to encourage sustained play.

Level	XP Required (cumulative)	XP to Next Level	Unlocks
1	0	100	Starting level. No upgrades available.
2	100	200	Bonus Pack cooldown upgrade (Tier 1)
3	300	400	Basic Pack XP upgrade (Tier 1)
4	700	700	Bonus Pack gem yield upgrade (Tier 1)
5	1,400	1,200	Bonus Pack stored count upgrade (Tier 1)
6	2,600	2,000	Bonus Pack card count upgrade (Tier 1)
7	4,600	3,000	Bonus Pack cooldown upgrade (Tier 2)
8	7,600	4,500	Basic Pack XP upgrade (Tier 2)
9	12,100	6,500	Bonus Pack gem yield upgrade (Tier 2)
10	18,600	9,000	All Tier 3 upgrades unlocked (values TBD)
11+	27,600+	TBD	Further tiers TBD

9.3 Upgrade System (Overview)

Upgrades are purchased in the Shop with Coins and/or Gems, but only if the player has reached the required level. Each upgrade has multiple tiers with increasing costs and benefits.

Upgrade	Affects	Currency	Level Required
Bonus Pack Cooldown	Reduces timer per tier (e.g. -30s per tier)	Coins + Gems	Level 2+
Bonus Pack Gem Yield	Adds gems per pack (e.g. +2 per tier)	Coins	Level 4+
Bonus Pack Card Count	Adds cards per pack (e.g. +1 per tier)	Gems	Level 6+
Bonus Pack Max Stored	Adds storable packs (e.g. +1 per tier)	Coins	Level 5+
Bonus Pack Rarity Table	Shifts roll table toward better rarities	Gems	Level 7+
Basic Pack XP Reward	Adds XP per pack (e.g. +5 per tier)	Coins	Level 3+

i Exact Coin/Gem costs per upgrade tier are TBD and will be balanced during playtesting. The structure above is definitive; only the numbers need tuning.

10. Card Opening UX Flow

Step	Description
1. Pack screen	Player sees the pack. Visual design reflects pack type. Tap to open.
2. (Optional) Surprise event	On tap: low-probability check. If triggered, evolution animation upgrades pack before proceeding.
3. Opening animation	Pack-specific animation plays. 5 card slots appear face-down.
4. Pre-sort (invisible)	Engine sorts the 5 drawn cards in ascending rarity order before display. Player never sees unsorted state.
5. Card reveal (x5)	Player taps each card. Cards flip one by one, least rare to most rare. Higher rarity = more spectacular animation.
6. 'New!' / Copies badge	New card: 'New!' tag. Duplicate: copy count shown (e.g. x3).
7. Summary screen	All 5 cards shown together. Save button persists results.

11. Collection Screen

- Unlocked cards: full illustration, name, type, rarity, copy count.
- Locked cards: black silhouette of the card shape. Name hidden (TBD).
- Progress indicator: X / Y cards collected.
- Filter and sort options (by type, rarity, owned/unowned) — proposed for v1.

12. Settings

Setting	Options / Notes
Language	English / Español. More languages in future.
Google Play Save	Connect account to cloud save.
Privacy Policy	Link to external URL.
Terms of Service	Link to external URL or in-app screen.

13. Visual & UX Style

- Colorful, epic, modern, detailed. Non-minimalist.
- Dark base background — card colours and effects pop against it.
- Card background colour determined by type. Card frame shape/silhouette determined by rarity.
- Higher rarity = more elaborate card frame and more spectacular reveal animation.
- Pack visual design is unique per pack type — art and colour scheme match the theme.
- Fonts: bold, modern, with fantasy undertones. Clean but impactful, not heavy serif.
- Variant cards (Special, Legendary, God) have progressively more elaborate layouts, up to full-art where the illustration fills the entire card with no traditional border.

14. Future Features (Roadmap)

Feature	Notes
Pack Upgrades	Further tiers beyond what Level System v1 exposes.
Fuse / Duplicates	Trade duplicate cards for Coins, Gems, or crafting materials.
Ad Rewards	Optional video ads for packs, gems, or coins.
Picks	Choose 1 card from 5 randomly presented options.
Scratch Cards	Scratch-and-win mechanic for bonus rewards.
More Collections	New card pools, themes, and fully real-world types (e.g. 'Dogs').
Daily & Weekly Missions	Short-term goals for engagement.
Infinite Achievements	Scaling achievement system with ongoing rewards.
More Tabs	Additional navigation tabs as features are added.
Real-World Type Collections	Fully non-fantastical types (e.g. dog breeds, bird species, landscapes).

i First public release targets inclusion of all roadmap features above. Early internal builds may omit them.

Changelog

Version	Date	Summary
0.1	Initial	First idea draft — base concept, stack, initial types and rarities.
0.2	2026-04-12	Full expansion: 10 types, card examples, pack system, SlotRule, Pack Upgrade Event, Bonus Pack, resource table, duplicate policy, visual style, roadmap.
0.3	2026-04-12	Cards catalogue with rarities + variant system. User Level system with XP, thresholds, and upgrade unlock gates. Pack rules refined (no duplicates per session, ascending rarity reveal order). Rarity-Boosted vs Lucky Packs clearly separated. All Bonus Pack parameters made upgradeable. Card scope expanded to include real animals, plants, objects, and landscapes. Pack Upgrade Event probability table defined.
